The agri-food sector is undergoing tremendous growth driven by a growing population, increase in GDP per capita and changes in lifestyle that are leading to more demand for packaged foods and beverages. The global growth in the middle-class population which enjoys a higher purchasing power, is driving the demand for premium high-quality packaged food including organic, natural and clean ingredients, as well as locally made products.

In terms of industry outlook, the Asia pacific region is forecasted to be the go-to market for the packaged agri-food players with expected industry growth of 3.6% between 2016 and 2021 (see table below). Fats and oils and dairy products are expected to be the highest growing agri-food categories in Asia Pacific at 8.3% and 4.4% respectively between 2018-2023.

01. GLOBAL OVERVIEW

02. REGIONAL OVERVIEW

In line with global trends, the Agri-food sector in the GCC region is also expected to continue growing, mainly due to a growing, urbanized population, higher per capita income, changing dietary habits and preferences and increasing penetration of organized retail. Food consumption in the GCC is expected to expand at a CAGR of 4.2% between 2016 and 2021, with cereals remaining the most consumed product in the region.

Saudi Arabia and the UAE are likely to remain the major food consumption centers. Food consumption in Saudi Arabia is expected to grow at an annual average rate of 4.2% between 2016 and 2021 and in the UAE is projected to grow by 4.4% for the same period.

The positive outlook for the agri-food sector regionally and globally bodes well for the local Lebanese agri-food producers that rely on export markets for their growth and expansion.

03. LOCAL OVERVIEW

The Agri-food sector is a major contributor to the Lebanese economy. In 2018 it generated an estimated 38% of the industrial sector output (figure 1) and around 2.9% of the country’s GDP. The sector added value has increased at a CAGR of 9.5% over the 2010-2018 period, with an estimated size of USD 1.6 billion in 2018 (figure 2).

- The sector currently employs an estimated workforce of around 21,000 employees (As per the latest survey by the Ministry of Industry)
- Agri-food companies employ around 28 persons (on average)
- The sector accounts for 25% of the industrial sector workforce

Figure 1: Industry Sub-Sectors Contribution to total Industrial GDP % | 2018

Agri-food enterprises account for the largest share of industrial establishments in Lebanon, with 26% of enterprises or 1,245 companies involved in agri-food activities (Figure 3). Agri-food activities are mostly concentrated in Mount Lebanon where 48% of agri-food enterprises are located. The Bekaa region ranks second (18%), followed by North Lebanon (9%), Baalback El Hermel (8%), South Lebanon (8%), Nabatiyeh (6%), Beirut (5%), and finally Akkar (2%) (Figure 4).

Figure 2: Contribution of Agri-food Sector to Total GDP Billion USD | 2010 - 2018

Figure 3: Distribution of Enterprises Among Industry Sectors % | 2017

---

5,6 Ministry of Industry, The Lebanese Industrial Sector Facts & Findings 2007
7 Ministry of Industry, 2017
The highest share of agri-food establishments is involved in the production of baked products and sweets with nearly 40% of total agri-food enterprises (figure 5). Dairy goods account for 11% of total agri-food companies. Other sectors of activity with a high share of enterprises include alcoholic beverages with 6%, followed by oil producing companies (mainly olive oil) with 5% of total establishments.

Key exported agri-food products in 2019 include dried fruits and nuts at 10%, followed by processed chocolate (8%) and other vegetables and food preparations (7%) (Figure 7). Export of agri-food products reached USD 434 million in 2019, a slight decrease from 2018 levels, as a result of the October 2019 crisis. Agri-Food exports accounted for 12.4% of industrial exports and 11.7% of total exports. Animal and vegetable fats and oils products (mainly olive oil) registered the highest growth among agri-food export categories, growing at a CAGR of 11% during 2010-2019 while total agri-food exports increased at a CAGR of 2% during the same period (Figure 6).

**02. EXPORTS DESTINATIONS**

Agri-food exports from Lebanon are heavily concentrated in the GCC region with very little diversification to other regions. The largest share of Lebanese agri-food exports is destined to Saudi Arabia (14%) followed by USA (9%), Qatar (7%), UAE (6%) and Iraq (6%) (figure 8).

![Figure 8: Export Destination for Agri-food Products % | 2019](image)

**03. IMPORTS**

Agri-food imports have slightly increased between 2010 and 2019 and amounted to around USD 1.6 billion in 2019 (figure 9) to cater for the demand stemming from the increasing refugee population. Lebanon mostly imports dairy products and cereal, with imports accounting for 18% and 16% respectively of total imports (figure 10), which could in the long run serve as an opportunity for local manufacturers to work on import substitution and expand production.

![Figure 9: Lebanese Agri-food Imports USD Thousands | 2010-2019](image)

![Figure 10: Lebanese Agri-food Imports by Product % | 2019](image)
COMPETITIVE ADVANTAGES

01. Large, Fertile and Diversified Agriculture Land

Lebanon has the second largest agriculture land share from its territory in the Middle East estimated at 63%, supporting the development of a competitive agriculture processing sector. Moreover, Lebanon has the highest precipitation rate among its neighbors, equivalent to 661 mm per year in depth which helps in the cultivation of a variety of crops (60+ types of crops and 10+ livestock products) (figure 11).

02. Skilled Labour Force with Competitive Wages

The agri-food sector benefits from a cost-effective labour force that can support its development and growth. Many public and private universities such as American University of Beirut (AUB), USEK, Balamand… offer agriculture and food industry study programs that serve the Agriculture and Food sectors. In 2018, around 30,000 students were enrolled in Engineering and Agri-food undergraduate and graduate degrees. Lebanon also boasts several applied research centers e.g. AUB’s AREC center in Bekaa, Lebanese Agricultural Research Institute (LARI)... that support in Research and Development and contribute to the sector growth and innovation.

03. Government Support

The Government of Lebanon has placed the agri-food sector as a key priority sector to develop and support:

- The Government offers many tax advantages for agri-food manufacturing companies as well as fiscal exemptions granted through IDAL.
- Agri-food exporters attend international fairs and exhibitions with support from IDAL through its Agro Map export program.
- The Ministry of Industry through the Industrial Research Institute and ELCIM center provides technical assistance to manufacturing companies including agri-food producers to improve their production processes.
- The Ministry of Foreign Affairs launched a gastro diplomacy initiative in 2018 aimed at promoting the Lebanese cuisine and Lebanese agri-food products worldwide.

04. A Large Diaspora Network

Lebanon has a large diaspora estimated at around 9 to 10 million people spread around the world which is a major demand driver for Lebanese agri-food products (figure 12).

Figure 12: Mapping of Lebanese Diaspora Around the World Population | 2017

Source: Mckinsey Lebanon Economic Vision 2018
05. Strong Support Networks
Agri-food companies in Lebanon have access to various Business Support Organizations that provide high-quality advisory services to help them grow and innovate. Berytech is one of the leading incubators in the country that provide mentoring and networking opportunities for the agri-food companies and hosts the only agrytech cluster in the Middle East region.

06. International Treaties and Agreements
Lebanon’s agri-food exports benefit from favorable terms and access to external markets thanks to a number of bilateral and multilateral agreements most notably EU- Lebanon Association Agreement, EFTA, GAFTA, GSP... These agreements have had a considerable positive impact on the Lebanese exports especially to the European markets (figure 13).

07. Access to competitive financing
The Central Bank of Lebanon offers subsidized loans for the industrial sector to support the development and expansion of productive industries including agri-food production, while Kafalat a government-owned loan guarantee agency provides financial guarantees for loans (up to USD 400,000) granted by commercial banks to the SMEs operating in the agri-food sector. In addition, companies operating in the sector can benefit from a series of financial and non financial incentives granted by the investment development authority of Lebanon (IDAL) given that certain requirements are met.

Figure 13: Lebanese Agri-food Products Exports to EU USD Thousand | 2013-2019

Source: Lebanese Customs, 2020
01. FOREIGN INVESTMENTS

Foreign companies operating in the agri-food sector include Swiss food and nutrition giant Nestle. Also producing in Lebanon are General Mills (USA), Coca Cola (USA), Unilever (UK / Netherlands), PepsiCo (USA), Bel (France), Heineken (Netherlands), Arla Group (Denmark), Lactalis (France) and Japan Tobacco International (Switzerland). Most of these companies have manufacturing plants in Lebanon through which they serve the local market.

02. LOCAL INVESTMENT TRENDS

The Agri-food sector in Lebanon is following the same global trends and moving towards the manufacturing of premium high-quality products for the conscious consumer. Between 2018 and 2019 two major new projects were announced for the production of healthy snacks and two other projects for the production of craft, artisanal alcoholic beverages (table 2) demonstrating the potential of investment in these new agri-food trends.

Source: IDAL
OLIVE OIL

- The olive oil market is leading the high demand for edible oils in the MENA region, with an expected CAGR of 5% by 2021, outpacing the global average of 4%\(^11\).
- As middle-class consumers are demanding more premium products, there are growth opportunities in the production of extra virgin olive oil, the highest quality of olive oil produced without any solvents.
- There are around 100 oil mills in Lebanon of which 25% are located in North Lebanon and 25% in Nabatieh\(^12\).
- Exports reached around USD 22 million in 2019 (figure 14), with USA (24%) & Saudi Arabia (13%) topping the destinations (Figure 15).
- Unexploited export market potential for Lebanese olive oil exists mainly in Saudi Arabia (USD 2.8 million), Italy (USD 470,000) and Brazil (USD 320,000).\(^13\)
- Leading local players include Kobayter Freres, Saifan Olive Oil and Willani. Zejd is leading the market for premium organic olive oil and flavored olive oil market.

15 ITC Export Potential Map
DRIED FRUITS AND NUTS

- The worldwide market for dried fruits and edible nuts is expected to grow at a CAGR of roughly 5.3% over the next five years and will reach USD 242,000 million in 2024, up from USD 178,000 million in 2019. ¹⁶
- Around 100 roasteries are available in Lebanon of which 50% are located in Mount Lebanon and 24% in Bekaa.
- Exports of dried fruits and nuts reached USD 45 million in 2019 with Saudi Arabia (17%) and USA (10%) topping the destinations (figure 18 & 19).
- Largest untapped export potential exists in Saudi Arabia (USD 7.7 million), Egypt (USD 2.25 million), and Spain (USD 1.69 million).
- Major local players include: Al Rifai, Castania, Al KAzzi and Al Andalous.

The global chocolate market was valued at around USD 103 billion in 2017 and is expected to reach approximately USD 162 billion in revenue by 2024, growing at a CAGR of around 7.0% between 2018 and 2024\(^\text{17}\).

There are more than 120 companies working in the production of chocolate in Lebanon with more than 50% located in Mount Lebanon.

Exports of chocolate and other food preparations containing chocolate have increased at a CAGR of 2.6% during 2010-2019 period with largest export market in Saudi Arabia (figure 20 & 21).

There is a huge untapped export potential for chocolate from Lebanon in the GCC countries: in Saudi Arabia alone, there is more than USD 4.4 million of untapped potential and in Kuwait more than USD 1.4 million.

Major players in chocolate production in Lebanon include Patchi with 145 boutiques around the world, Dandy, Bassam Ghrawi among others.

---

\(^{17}\) Zion Market Research, Global Chocolate Market, 2017-2024
MENA countries top the list of dairy products importers and are expected to account for 24% of world imports in 2027, South East Asia for 12% and China for 13%, while developed countries will have a 20% share of total. Lebanon has so much potential to increase its market share in dairy production in the region and address growing demand.

There are around 100 dairy factories mainly concentrated in Bekaa (45%) and Mount Lebanon (31%).

Dairy products exports reached around USD 3.9 million in 2019 with Iraq (28%) and Qatar (11%) topping the destinations (figure 23).

Major local players include: Taanayel Les Fermes, LibanLait and Khoury Dairy
